IMPORTANT NOTICE

Many telephone customers have had their telephone service provider changed without their consent. This practice is known as “slamming”. In order to better serve you and keep you from getting your service changed without your authorization, we now provide a free service for our customers who would like to have more control over their telephone service. This free service is called a **preferred carrier freeze**. A preferred carrier freeze prevents a change in a subscriber’s service without the consent of the subscriber. The preferred carrier freeze can be placed on your intraLATA (Eastern Iowa region) and/or interLATA (National & International) telecommunications carriers. **If you wish to place a preferred carrier freeze (PIC freeze) on your telephone service, please fill out the form below and return to the Grand Mound Communications office.**

Once the preferred carrier freeze is in place, the freeze can only be lifted by you either through written or oral authorization. The authorization required for the lifting of the preferred carrier freeze is in addition to the regular verification process required to change to a different long distance service. The written authorization must be signed and state your intent to lift a preferred carrier freeze. It should also include your billing name and address and each telephone number to be affected. If you have a freeze on more than one service (intraLATA, interLATA), please also state which of the services are to be affected. The oral authorization can be initiated by the customer or can be a three-way conference call with you, the carrier to which you wish to switch, and one of our service representatives.
